React

GitHub

Node.js

Mobile-First Design

Responsive Web Design

PROJECTS

MAINTAINABLE: <https://maintainable.herokuapp.com/> || <https://github.com/vohoang2005/maintainable>

- This is an application for use in recording the details and maintenance history of the air conditioning assets of an HVAC service provider.
- Features: Mongo DB, Mongoose, Node.js, Express.js, React, and GraphQL

RANDOM: <https://ran-dm.herokuapp.com/login> || <https://github.com/vohoang2005/randm>

- RANDM is a dating application that helps users find matches through randomization. While other dating apps on the market focus too much on matches based on initial judgement, (such as profile pictures), with RANDM, people can start chatting with and getting to know potential dates without that initial judgement in an app free of profile pictures and "swiping".
- Features: Node.js, Express.js, MySQL, Sequelize, Handlebars, Bcrypt, Socket.io
